

## **Pfizer UK Undergraduate Programme 2018/2019**

### **Clinical Sciences Undergraduate**

Clinical Development and Operations, Global Product Development

Clinical Sciences

#### **Department Overview**

Clinical Sciences is a global group which plays a key role on the Pfizer clinical trial team. We are responsible for high quality protocol development, study execution and data interpretation. In order to support the development of new medicines the group partners closely with other clinical and clinical operations team members, applying technical and scientific excellence to support the design and execution of clinical trials.

#### **What can I achieve and what will I be responsible for whilst completing a placement at Pfizer?**

In this role the successful candidate will have the opportunity to develop an in depth understanding of the key elements of the clinical study lifecycle including:

- Protocol and informed consent document development,
- Data collection methodology and data review planning
- Clinical trial execution including ongoing review of study data including safety, efficacy and quality.
- Clinical Study Report (CSR) development.

Successful applicants will work closely with an experienced Clinical Scientist and the global study team and will be expected to develop a sound technical grasp of the key clinical sciences and clinical trial deliverables on one or more interventional clinical trials with the opportunity to work across multiple Therapeutic Areas within Global Product Development (GPD).

#### **What other opportunities and benefits do Pfizer offer?**

The Clinical Sciences group partners closely with other functions within Pfizer and as such the successful candidate has the opportunity to gain insights to other core clinical development functions including:

- Study management
- Medical Affairs
- Regulatory
- Safety Risk Management

Successful applicants will also have the opportunity to have access to an extensive library of training tools and participate in regular educational sessions.

### When can I start?

Placements will start on 3rd September 2018 and will run for 12 months.

### PERSON SPECIFICATION

Type of person we are looking for, in relation to 'Skills', 'Knowledge' and 'Motivation':

- On target for a 2:1 Degree Classification in a life sciences or associated discipline
- Self-motivated with ability to work independently
- Detail focused
- Solution oriented and good collaborative problem solving abilities
- Strong communication skills
- High IT literacy

**Please note that we only accept application forms. Please do not send over your CV or cover letter as they will not be considered.**
